# 312 SCHOOL

DevOps Engineering course

A 7-month path to your job:

First 5 months

1. Skills

Learn the most in-demand DevOps tools, such as:
Amazon Web Services (AWS), Linux, Docker, Kubernetes, Helm, Azure, Git, Python, Terraform, CI/CD, GitHub Actions, JIRA, Slack, ArgoCD, GitOps, GitLab, Ansible, Packer, GitLabCI, Packer, Datadog, and more.

2. Experience

Complete home assignments, labs, quizzes, and group projects.

✳ Real-world emulation of tasks and DevOps work environment.

3. Certifications

Prepare for DevOps certifications by watching our pre-recorded sessions, completing our practice tests and simulation labs, and exploring selected resources.

✳ It will increase your marketability.

Last 2 months

4. Final Project

Work on a graduation project under the supervision of an assigned project manager.

✳ Opportunity to work on a complex real-life project that you can refer to during the interviews when describing your experience.

5. Career Center

Job-hunting preparation and Market Crash Course.

✳ A team of 8 specialists, currently hiring for other big companies, will help you land your dream high-paying job.

312 SCHOOL Start & Schedule

The upcoming batch starts on
April 1st

Study formats:
On-site, Online

Class Schedule:

Mon **Wed** **Thu** **5:30 pm - 9:00 pm CST** (Chicago time)

Sat **10:30 am - 2:30 pm CST** (Chicago time)

The schedule for both online and on-site students remains the same for the majority of the program, but it may vary.
The estimated workload, including homework, is a minimum of **35-40 hours per week** (it's a full-time program).

📍 **The address of 312 School's campus:** 1834 Walden Office Square #225, Schaumburg, IL 60173

312 SCHOOL · Tuition Options and Pricing

312 School offers two types of tuition:

Preferred Tuition	Affordable Tuition

Preferred Tuition

Starting at
$899/month
for 7 months.

Affordable Tuition

Starting at
$599/month
for 6 months.

Short overview:

🔥 • The Preferred Tuition includes all Affordable Tuition features, plus enhanced services like a live interview assistance with AI, an imitation of a real work environment, more personalized assistance, and you will be working with **professionals who have greater experience than in the Affordable Tuition**, such as mentors, career coaches, recruiters, technical specialists, etc.

• The Affordable Tuition offers a gold standard, comparable to what any other DevOps Bootcamp offers, but with our own advanced program, highly experienced instructors, interview and resume preparation, and job-searching assistance.

3I2 SCHOOL Preferred Tuition Pricing

Pay full tuition and receive a **7% Discount** ⭐

Studying Online
1. Upfront plan

Total Cost **$10,230**
⭐ (you're saving $770)

Studying On-site
2. Upfront plan

   $4,194 in total within 6 months

After you get a job

4. Final payment upon hiring (Paid within two months after the start date at a new job) — $1,406

312 Guarantees

We will be with you until you get a job

⭐ Or your money back

Applies only for Preferred Tuition.
If you don't get a job offer in DevOps within 6 months of active job search after graduation, we'll refund a part of your tuition fees. The amount depends on the payment plan you choose:
- Standard 75%/25% plan: 25% refund.
- Simple Upfront plan: 50% refund.

1st month trial

Applies for both: Preferred Tuition and Affordable Tuition.
We're confident that 312 School can meet your needs, and that's why we offer the first month as a trial: within the first 30 days of the course we refund you the whole amount you've paid, except for $250, which we retain as an inconvenience fee.

Tuition Comparison

What's the same?   Preferred Tuition vs. Affordable Tuition

	Preferred Tuition	Affordable Tuition

Features Explanation

Team Mini-project vs. Self-paced

🔥
- **In Team:** Students will complete tasks in a small team led by a scrum mentor. They will build an infrastructure together. The whole process of working in a team simulates **a real work environment** which is a very beneficial skill for graduates' future jobs.

- **Self-paced:** Students will complete tasks individually to build the project.

Scrum Teams vs. NO Scrum Teams

- **Scrum Team:** Starting from the 2nd month and until the end of the program, students will become a part of a scrum team (around 10 people) with a dedicated scrum mentor.

  Benefits:
  1. Working in a team is a very beneficial skill which will help you a lot once you get a job.
  2. Being a part of a little group helps a lot with motivation and burnout. Teammates will be helping each other, and pushing each other.
  3. With a team you will be able to fully build a Mini-project and Final Project which will provide the highest level of experience and understanding of them.

More experienced leadership on the Final Project vs. the Final project from the Affordable Tuition

🔥
- **Preferred Tuition:** The Final Project is guided by even more experienced leaders than in the Affordable tuition. Our current team leads are professionals from top IT companies like Microsoft and have many years of experience. They are not graduates of any bootcamp. Being under the guidance of these professionals will provide you with a high-quality level of experience while doing the project.

- **Affordable Tuition:** You will be under the guidance of a Middle DevOps Engineer, a gold standard for every bootcamp.

3 Mock Interviews vs. 1 General Mock Interview

🔥
- **3 Mock Interviews:** These simulate a real interviewing process. You will go through a three-stage interviewing process:
  - Screening (phone call with a real Recruiter)
  - Behavioral interview
  - Technical interview

    These 3-stage Mock Interviews are conducted by highly experienced professionals, each specializing in a specific area: recruiting, soft skills for tech companies, and technical expertise. Here, you will also receive an extra retake of each interview, allowing you to polish your skills and fully prepare for real interviews.

- **1 General Mock Interview:** This will test your knowledge as it would in a real interview and provide feedback on areas for improvement. This interview is conducted by an experienced DevOps Engineer.

According to our statistics, this part of the program significantly impacts students' employment prospects: 95% of students who passed the 3 mock interviews received a job offer with a high base salary.

Regular vs. Advanced Interview Prep with Extra Writing Workshops

🔥
- **Preferred Tuition:** In addition to interview preparation sessions, you will participate in extra hands-on workshops. Here, you will work on your resumes and interview answers alongside experienced career coaches.

- **Affordable Tuition:** You will have access to our advanced resume and interview preparation sessions led by career coaches.

Features Explanation

Regular vs. Advanced Resume Review and Approval

🔥
- **Preferred Tuition:** Your resume will undergo a double review by two different professionals with even more experience. This double review significantly increases the number of interviews you may receive.

- **Affordable Tuition:** Your resume will be reviewed and approved by one professional.

Advanced Market support with personalized continuous support vs. Regular Market support

🔥
- **Preferred Tuition:** This is where the biggest difference between the tuitions comes into play:

  a. **Market Prep Groups** help students complete all their interview preparation in a small group led by a Coach.

  b. **Job Search Groups** assist students in staying motivated and receiving continuous mental and technical support during the job search process, which can be a stressful experience. These groups are small and led by an active professional in the field, who can guide and answer job search or interview-related questions that students face during real interviews. Meetings are held twice a week for discussions, progress sharing, question answering, and providing the necessary personal support for each student in the group. Small Job Search Groups have proven to be very effective as they add more discipline and provide even more reviews and support.

  c. **Potential reviews** of your interview recordings, additional evaluations of your resume, and guidance on how you apply for jobs will be provided as necessary at any stage of your job search process.

- **Affordable Tuition:**
  a. **Self-paced job search**, under the guidance of career coaches. You will get access to the interview preparation course and all the job search resources.
  b. **Support is provided** over chat and occasional meetings for a whole batch. You will always receive support for your questions and guidance from the career coach.

312 SCHOOL Features Explanation

Limited Jira Access for Projects vs. Full Access for Every Homework

🔥
- **Preferred Tuition:** Jira is one of the most important tools in the real workplace. Having full access to Jira for every homework assignment will teach you task management, and mirroring practices at every company out there. Once it becomes a habit, your first few months at a real job will be much easier.

- **Affordable Tuition:** Students in this tuition will use Jira as a task manager for the Mini-project and the Final project, providing an understanding of how to work with this tool. Other assignments will be submitted through the 312 School's portal.

Limited Metrics vs. Full Metrics on the Students' Portal

At 312 School, we track students' performance based on assignments, tests, projects, and performance interviews after certain important phases.

🔥
- **Students on the Preferred Tuition** will have full access to the metrics. The school conducts more performance reviews and maintains control of them, which helps prevent you from falling behind and provides immediate extra assistance when needed.

- **Students on the Affordable Tuition** will get access to the most essential metrics.

Live Interview Assistance with AI

- **Included to the Preferred Tuition**, 312 School offers an AI software superior to ChatGPT.

  What makes it unique? It's trained on our curriculum, interview preparation, and market trends, serving as your rapid assistant for interview readiness. Our AI Live Interview Assistant can provide immediate answers or guidance during your mock or training interviews in real-time. It listens to the question asked and provides the answer or guidance.

- **Affordable tuition:** could be purchased as an add-on for an extra $2,000
